

HPV VACs: Vaccinate Adolescents against HPV Cancers

MATERIALS TO PROMOTE THE TRAINING

Partners,

Thank you for championing cervical cancer prevention through HPV vaccination. Below you will find a flyer, sample website or newsletter content, and social media messages that you can share with your healthcare provider networks to engage them in the *HPV VACs: Vaccinate Adolescents against HPV Cancers* training program.

The target audiences for the materials and messages are healthcare providers, medical societies, and public health professionals. You may use the suggested text as-is or modify it to fit your audience. Please do not modify the social media images, other than adding your logo, if desired.

Please share these resources with other partners who may find them helpful.

Thank you for your partnership in the effort to increase HPV vaccination to prevent cervical cancer!

Protect every girl, everywhere, from cervical cancer.

Announcement Template

How to use this template:

This document provides a pre-written announcement letter that medical societies can use to inform healthcare professionals and civil society organizations about the launch of a global online training program and ready-to-use resources on HPV vaccination knowledge and communication.

Please tailor the message as needed by modifying sections highlighted in red.

Short announcement for web use

Title: Join us in eliminating cervical cancer through HPV vaccination

[INSERT NAME OF REGIONAL OR LOCAL MEDICAL SOCIETY] is proud to join with the International Pediatrics Association in a global initiative aimed at eliminating cervical cancer through HPV vaccination in collaboration with the American Cancer Society. This initiative spotlights the leadership of healthcare providers and medical societies to protect every girl, everywhere, from cervical cancer.

One action we urge every health care professional to take is enrolling in **HPV VACs: Vaccinate Adolescents against HPV Cancers**, a free seven-module course that strengthens knowledge, builds confidence in vaccine recommendations, and offers practical guidance for addressing common questions and misinformation. We invite healthcare professionals to:

- [Enroll in the course](#)
- **Use the resources** in your clinic and community
- **Share this opportunity** within your networks

Join us to help ensure that every girl, everywhere, is protected from cervical cancer through HPV vaccination.

HPV VACs: Vaccinate Adolescents against HPV Cancers

Announcement letter or email

Subject: Join us in eliminating cervical cancer through HPV vaccination

Dear Physician,

[INSERT NAME OF REGIONAL OR LOCAL MEDICAL SOCIETY] is proud to join with the International Pediatrics Association in a global initiative aimed at eliminating cervical cancer through HPV vaccination in collaboration with the American Cancer Society. This initiative spotlights the leadership of healthcare providers and medical societies to protect every girl, everywhere, from cervical cancer.

Why this initiative matters

The science is clear – HPV vaccination is a safe and effective way to prevent cervical cancer and other HPV-related cancers. Yet too many girls remain unvaccinated. We need to act now. Evidence consistently shows that a clear and confident recommendation from a trusted healthcare provider is a strong predictor of vaccination.

About the initiative

HPV VACs: Vaccinate Adolescents against HPV Cancers is a free online training developed by and for healthcare providers. It covers:

- The global burden of HPV-related cancers and cervical cancer
- HPV vaccine science, safety, and effectiveness
- Practical strategies for recommending the vaccine and addressing common questions
- The critical role of healthcare professionals as champions for HPV vaccination in clinics, communities, and professional networks

Invitation to engage

We invite healthcare professionals to:

- [Enroll in the course](#)
- **Use the materials in your clinic (posters, parent handouts, FAQs)**
- **Share this opportunity within your organization and professional networks**
- **Recommend the HPV vaccine to eligible children in your clinics and community**

Together, we can – and we must – help ensure that every girl, everywhere, is protected from cervical cancer through HPV vaccination.
